NEA/ NEA-Alaska Micro-credential Virtual Professional Learning Communities

A micro-credential is a short, competency-based recognition that allows an educator to demonstrate mastery in a particular area.

NEA and NEA-Alaska will be providing members an opportunity to participate in a virtual Professional Learning Community (PLC) to support successful completion of a NEA Micro-credential from start to finish. Educators who participate in a PLC to complete a micro-credential are more likely to earn their badge the first time. Registration closes April 30. PLCs start in early May and end in late June. The virtual PLC will be facilitated by a trained micro-credential facilitator and consist of weekly support meetings via zoom.
You may register for one of the following PLCs by clicking the registration link at the bottom of this page.

- Exploring Restorative Practices
- Coaching and Mentoring
